

DO YOU OR SOMEONE YOU KNOW HAVE AUTISM?

The UCLA Center for Autism Research and Treatment (CART) is conducting a research study to examine the safety, tolerability and effects of an investigational medication (AZD7325) on social communication in adults with Autism Spectrum Disorder (ASD). This study will involve up to 9 visits to UCLA over 12 weeks.

Eligible participants must be

- Between 18 and 35 years of age
- Diagnosed with autism

Participants may receive up to \$275

For more information, contact UCLA at
