

# **Social-Communication Skills in Children with Autism**

## **Does your child:**

- **Have a diagnosis of Autism?**
- **Between the ages of 3 and 5 years old?**
- **Been in school for at least 3 months?**
- **Not yet or just beginning to use spoken language?**

**We would like you to participate in a study examining social-communication skills in young children with autism.**

**We provide assessments of current development on language, cognition, play and communication skills. Some children may participate in a social-communication skills intervention at school.**
