# Why is each child so different? How can we ensure success in each child?

**KAITO**  
"STORY MAN"  
"3D MAN"

Avoids reading

Empathic

Spiderman  
- Halloween

**TAIGA**  
"INFORMATION  
SEEKER"

Avid reader

Analytic

Red/White  
blood cell  
- Halloween

# Jack Horner, a paleontologist from Jurassic Park/World

Importance of resilience

Importance of environment & community

Importance of looking at an individual as a whole  
(including literacy but also other cognitive and  
socio-emotional aspects)

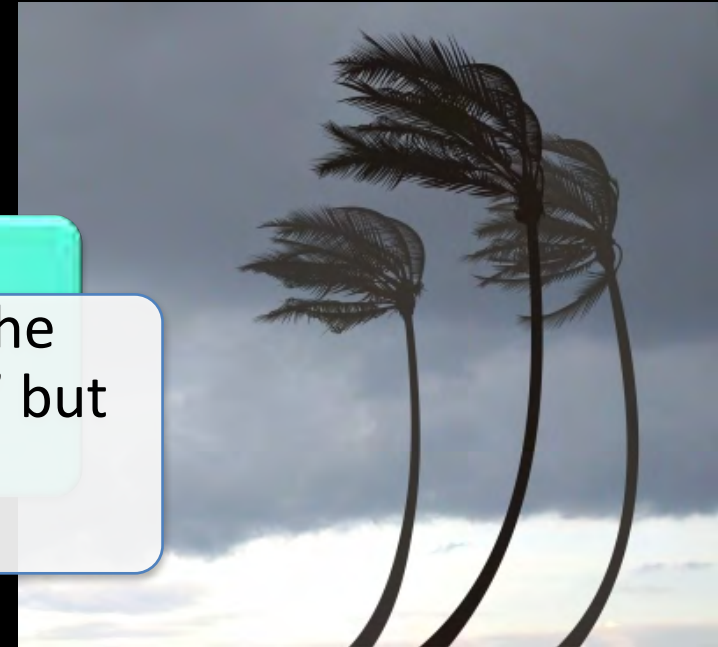

# Resilience

The ability to adapt to stressors in the environment (adversity) by “bending” but not “breaking”

(Karatsoreos & McEwen F1000Prime Reports 2013)

Socio-emotional resilience

Cognitive resilience

# Outline

- IMPORTANCE OF AN INTEGRATIVE APPROACH
  - Reading & dyslexia are complex.
  - Multiple factors impact dyslexia & success.
- THE NEW NEUROSCIENCE OF DYSLEXIA
- COGNITIVE RESILIENCE
- SOCIO-EMOTIONAL RESILIENCE
- CONCLUSION

- ▶ **IMPORTANCE OF AN INTEGRATIVE APPROACH**
  - Reading & dyslexia are complex.
  - Multiple factors impact dyslexia & success.

- THE NEW NEUROSCIENCE OF DYSLEXIA
- COGNITIVE RESILIENCE
- SOCIO-EMOTIONAL RESILIENCE
- CONCLUSION

# Cost of Dyslexia

SUSCEPTIBILITY  
GENES

Risks

1) There is no enjoyment in reading

2) Doesn't get enough practice

3) Doesn't develop automaticity

4) Reading becomes unpleasant

5) Poor vocabulary growth

6) Poor attitude toward school

7) Affects motivation to read

PHONOLOGICAL

ORTHOGRAPHIC

Downward spiral

**POOR OUTCOME:** Reading Comprehension, Educational Attainment, Psychosocial Adjustment

# Cost of Dyslexia

## Matthew Effect in Reading

*Pennington & Lefly. Child Develop 2001; Cosden JLD 2001; Wilson et al. JLD 2009; Foresight Mental Capital and Wellbeing Project. 2008 ; DuPaul et al. JLD 2012;*

Stephanie Haft

# Resilience Model of LD: Promoting Resilience & Optimizing LD Outcome

Haft, Myers, Hoeft. *Curr Opin Beh Sci* 2016

## INTERNAL

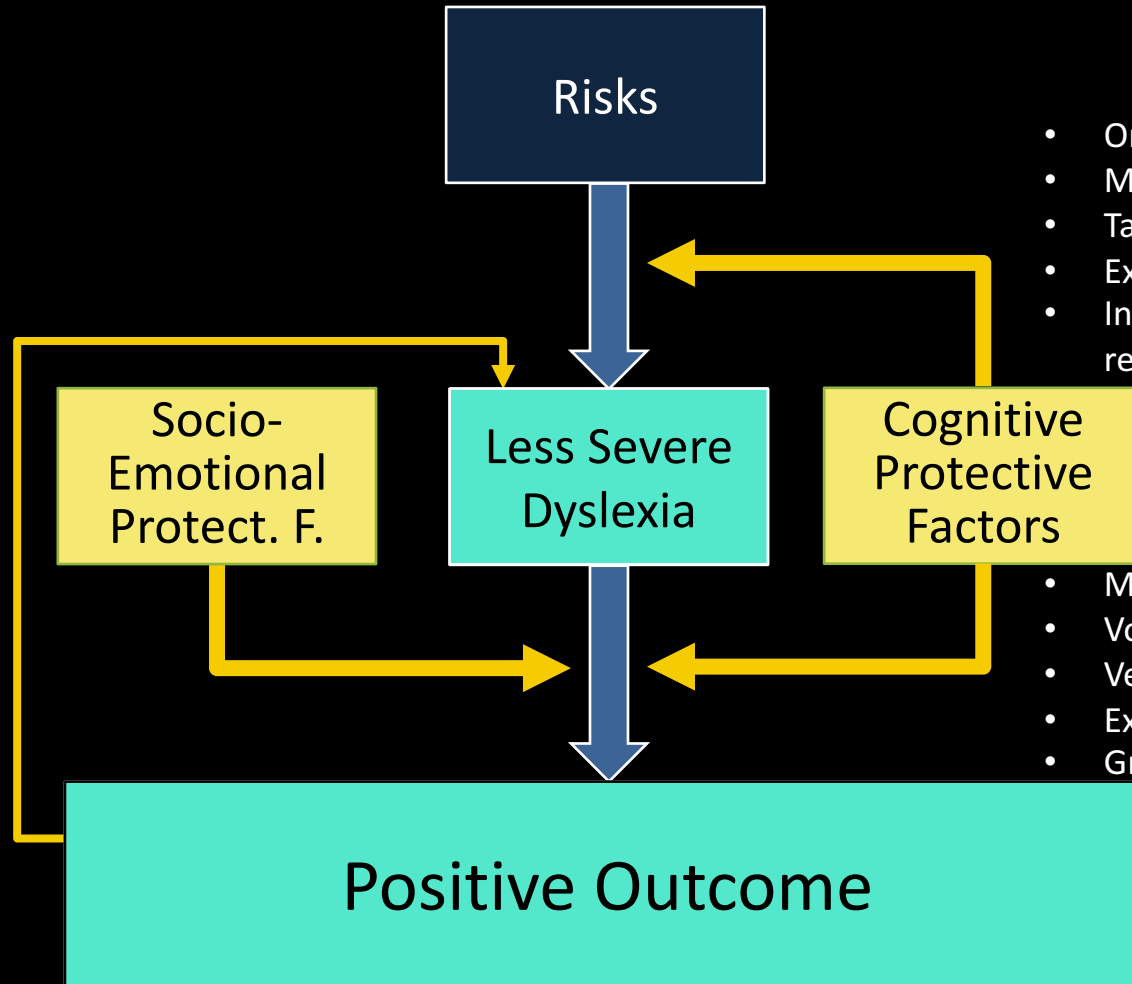

- Growth mindset
- Hopeful thinking
- Sense of coherence
- Locus of control
- Self determination

## FAMILY

- Family cohesion
- Maternal affect
- Strong parental attachment
- Parental support & understanding of RD

## PEER/SCHOOL

- Peer relationships
- Mentorship by teachers
- Teacher support
- Small class-size

- Oral language skills
- Motor skills
- Task-focused behavior
- Executive functions
- Interpersonal relationships

- Morphological awareness
- Vocabulary
- Verbal reasoning
- Executive functions
- Grammar

# Importance of an Integrative Approach to Maximizing Children's Learning Potential

Weaknesses vs. Relative strengths

Risk vs. Protective factors

Vulnerability vs. Resilience

- IMPORTANCE OF AN INTEGRATIVE APPROACH
  - Reading & dyslexia are complex.
  - Multiple factors impact dyslexia & success.

## THE NEW NEUROSCIENCE OF DYSLEXIA

- COGNITIVE RESILIENCE
- SOCIO-EMOTIONAL RESILIENCE
- CONCLUSION

# Multiple Factors Contribute to Dyslexia

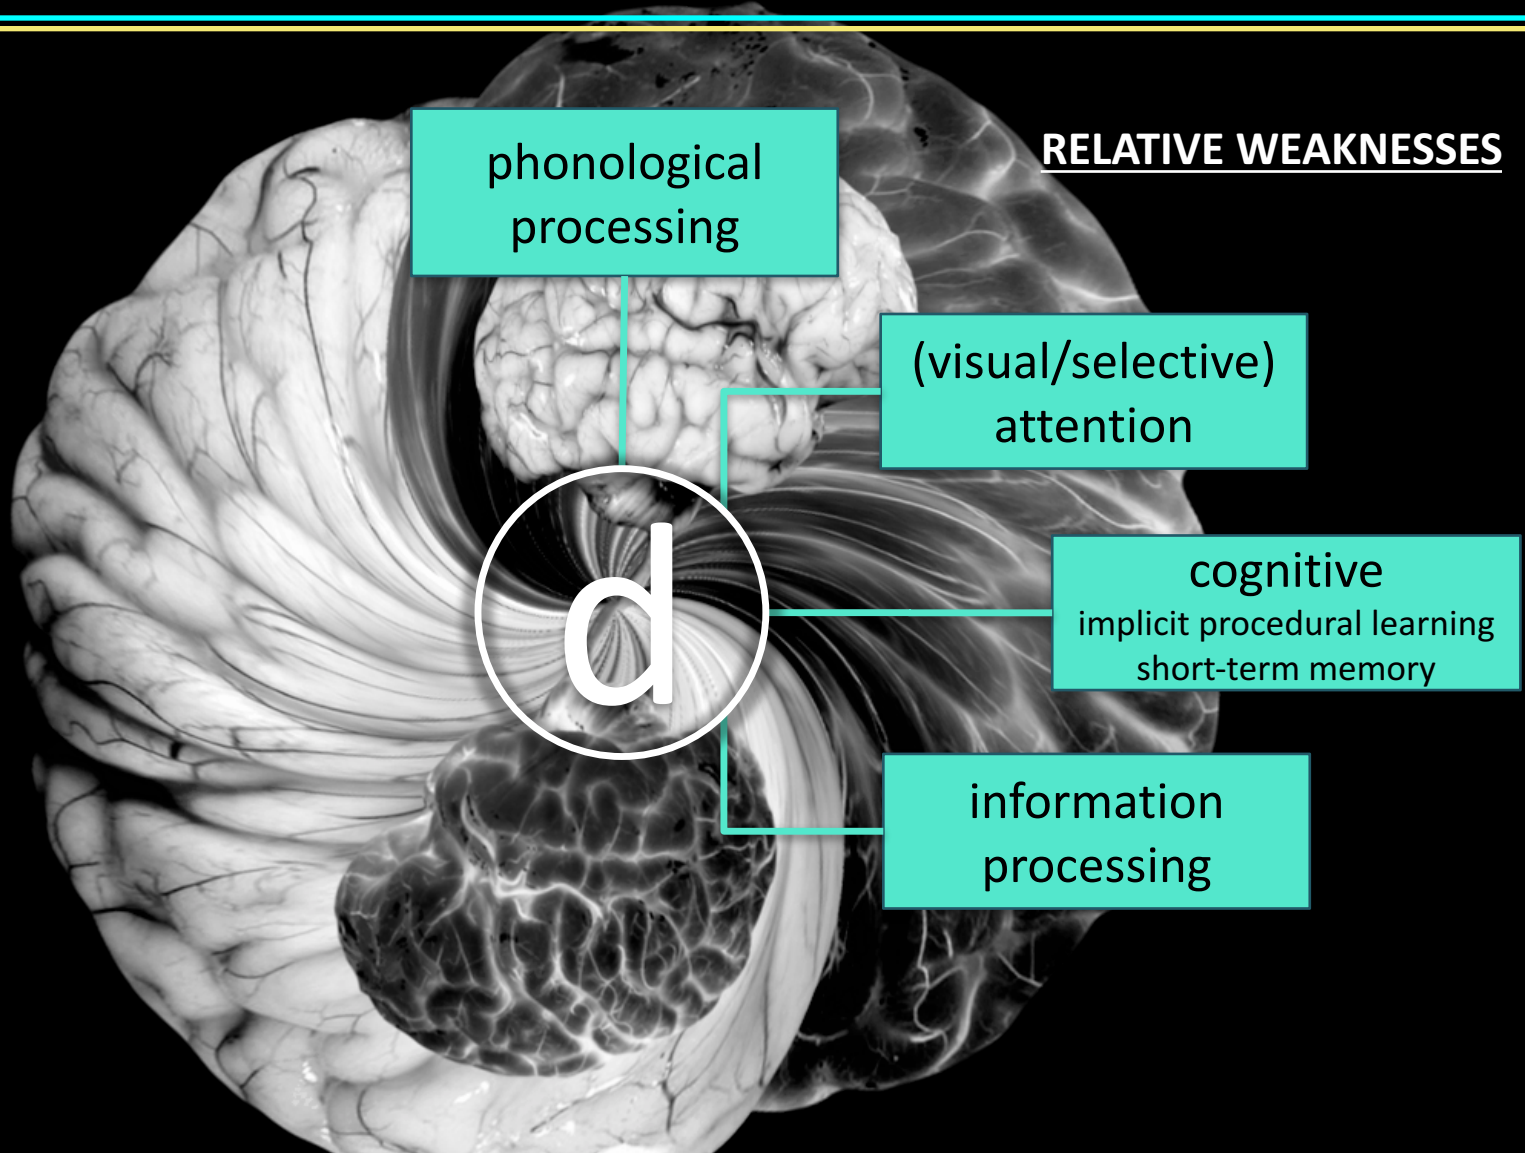

*Pennington. Cognition 2006. Pennington et al. J Abnorm Psychol 2012. – Multiple deficit model*

*Diathesis-stress model: Rosenthal ed. "The Genain Quadruplets" '64*

*Liability threshold model: Gottesman & Shields. PNAS '67*

# The Neuroscience of Dyslexia – Traditional View

## Focus on Weaknesses, Risks & Vulnerability

# The Neuroscience of Dyslexia – Traditional View

## Focus on Weaknesses, Risks & Vulnerability

### POOR READERS & DYSLEXIA.

Reduced efficiency in brain networks related to speech & visual aspects of reading.

*Shaywitz et al. NEJM '98; Hoeft et al. J Neurosci '06. Hoeft et al. PNAS '07*

# The Neuroscience of Dyslexia – Emerging View

## Focus Also on Strengths, Protective Factors & Resilience

### RELATIVE STRENGTHS

visuo-spatial  
Holistic, 3d

cognitive  
explicit memory  
comprehension

IQ, reasoning,  
oral language ...

Grit, Resilience,  
Mindset, Empathy

phonological  
processing

d

character traits,  
socio-emotional

### RELATIVE WEAKNESSES

(visual/selective)  
attention

cognitive  
implicit procedural learning  
short-term memory

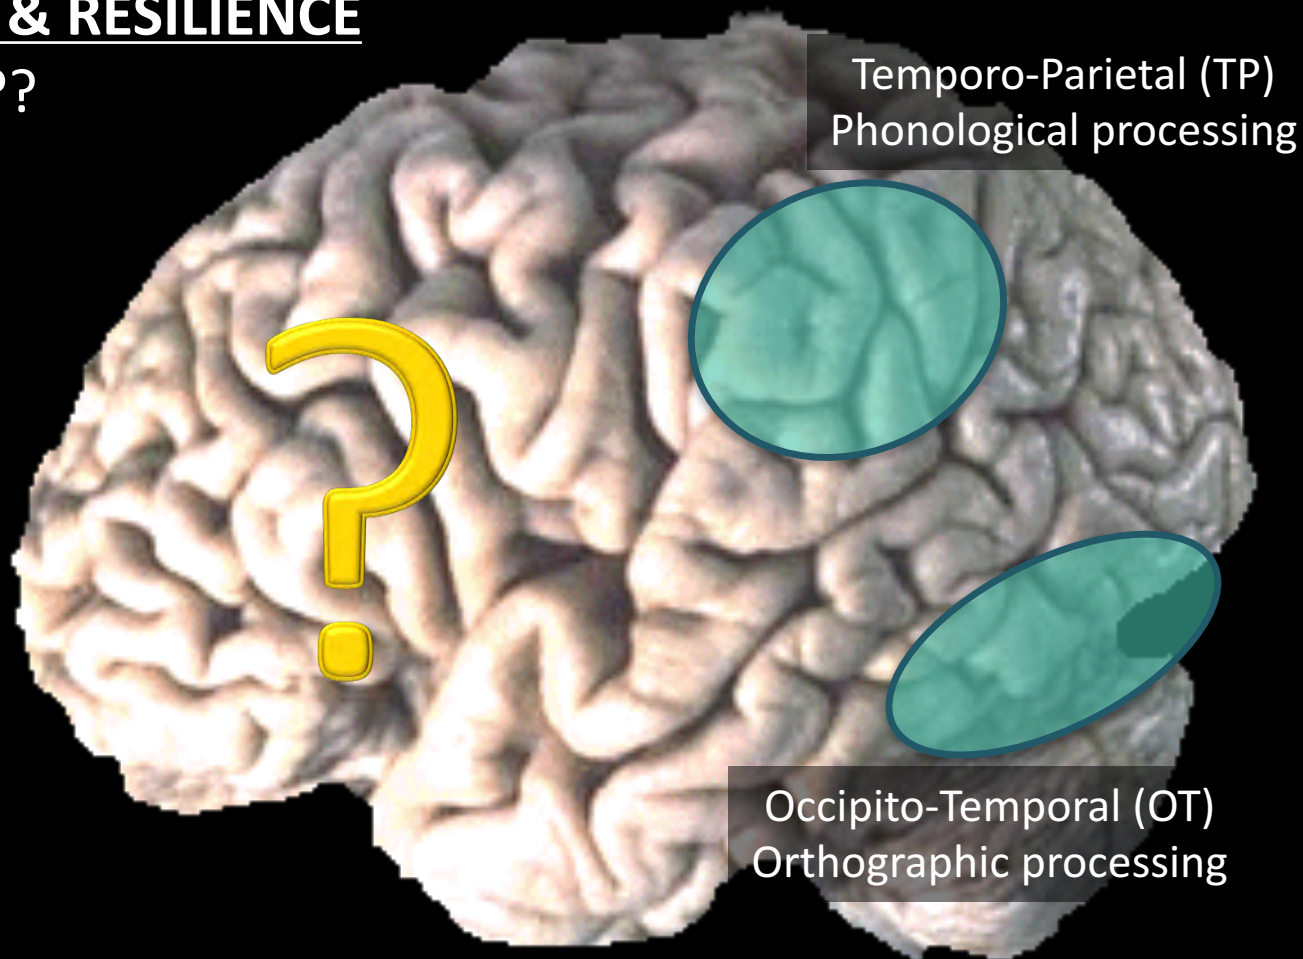

information  
processing

# The Neuroscience of Dyslexia – Emerging View

## Focus Also on Strengths, Protective Factors & Resilience

### PROTECTIVE FACTORS & RESILIENCE

Which brain systems???

# Strengths, Protective Factors & Resilience: Coincidence, Compensatory or Meant to be?

- **Coincidence** Bryden MP. Laterality '87
- **Compensatory** Lansdell HJ. Comp Physiol '69, Levy J. Nature '69
- **Causal** Kosslyn SM. Psychol Rev '87, Cai et al. PNAS '13 **Evolutionary advantage** Geschwind N. Annals of Dyslexia '84

# Integrative Approach to Dyslexia Research

# Integrative Approach to Dyslexia Research

## Brain electrical activity

## Brain structure & function

## Genetics

## Brain stimulation

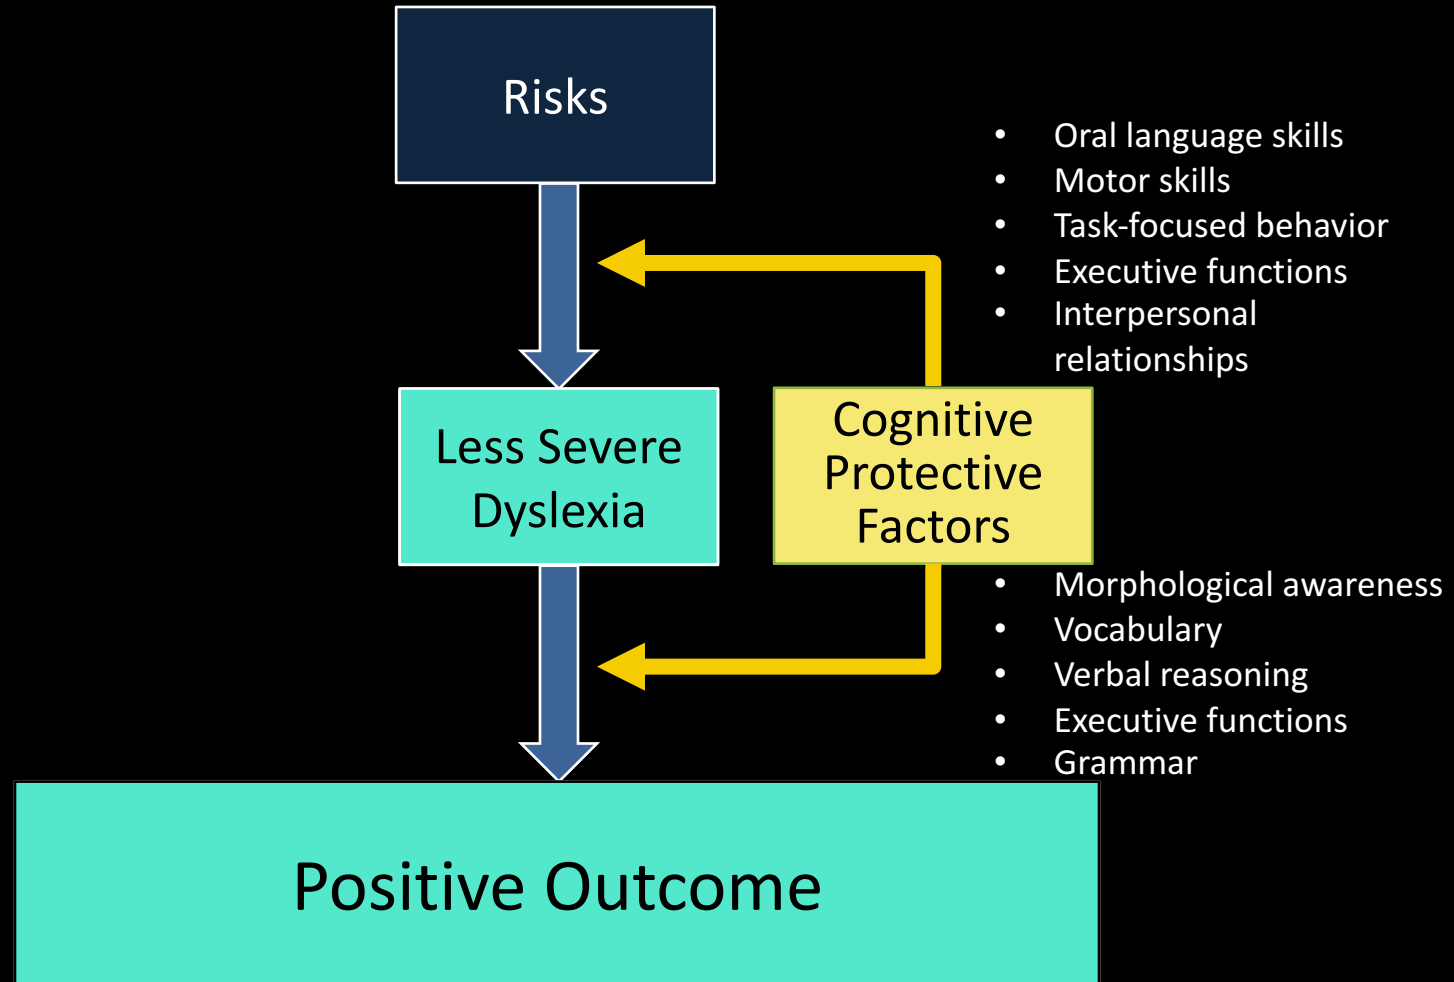

- IMPORTANCE OF AN INTEGRATIVE APPROACH
  - Reading & dyslexia are complex.
  - Multiple factors impact dyslexia & success.
- THE NEW NEUROSCIENCE OF DYSLEXIA
- ▶ COGNITIVE RESILIENCE
  - SOCIO-EMOTIONAL RESILIENCE
  - CONCLUSION

# Resilience Model of LD: COGNITIVE RESILIENCE

Haft, Myers, Hoeft. *Curr Opin Beh Sci* 2016

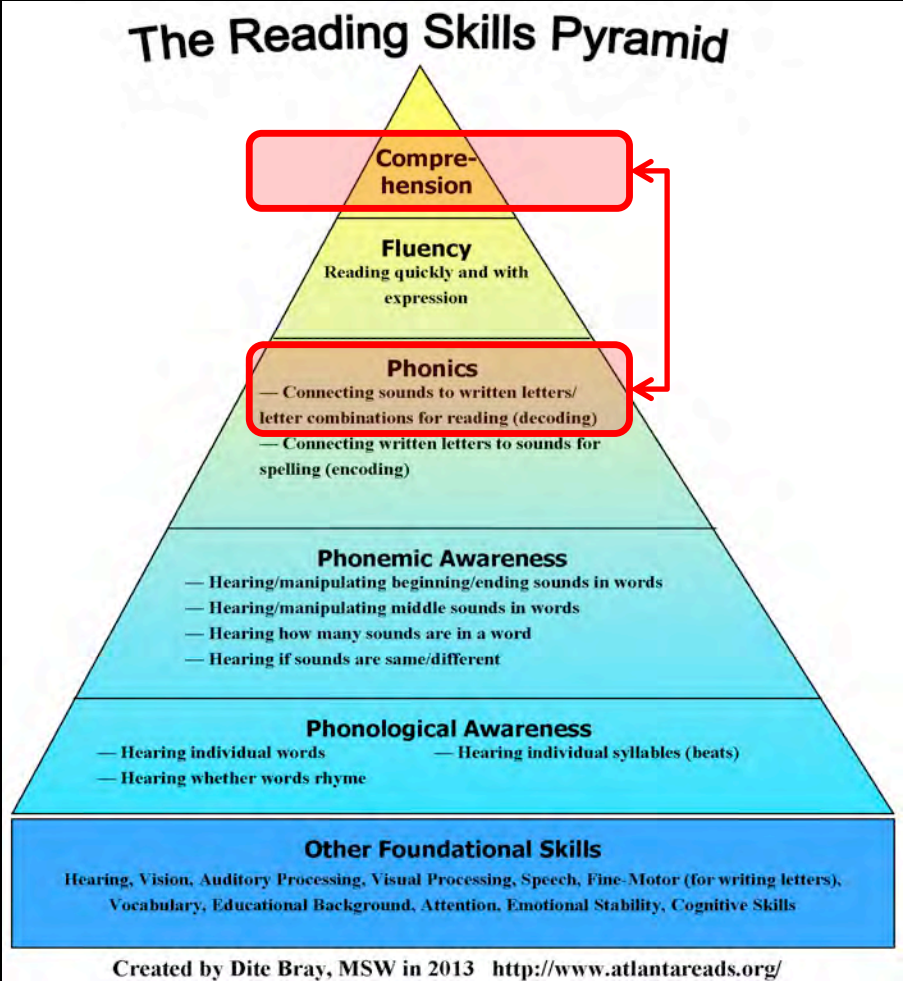

# COGNITIVE RESILIENCE Resilient Dyslexics

**RESILIENT READERS:** Those with good comprehension despite poor decoding.

Those with decoding difficulties rely more on contextual information to be able to read successfully.

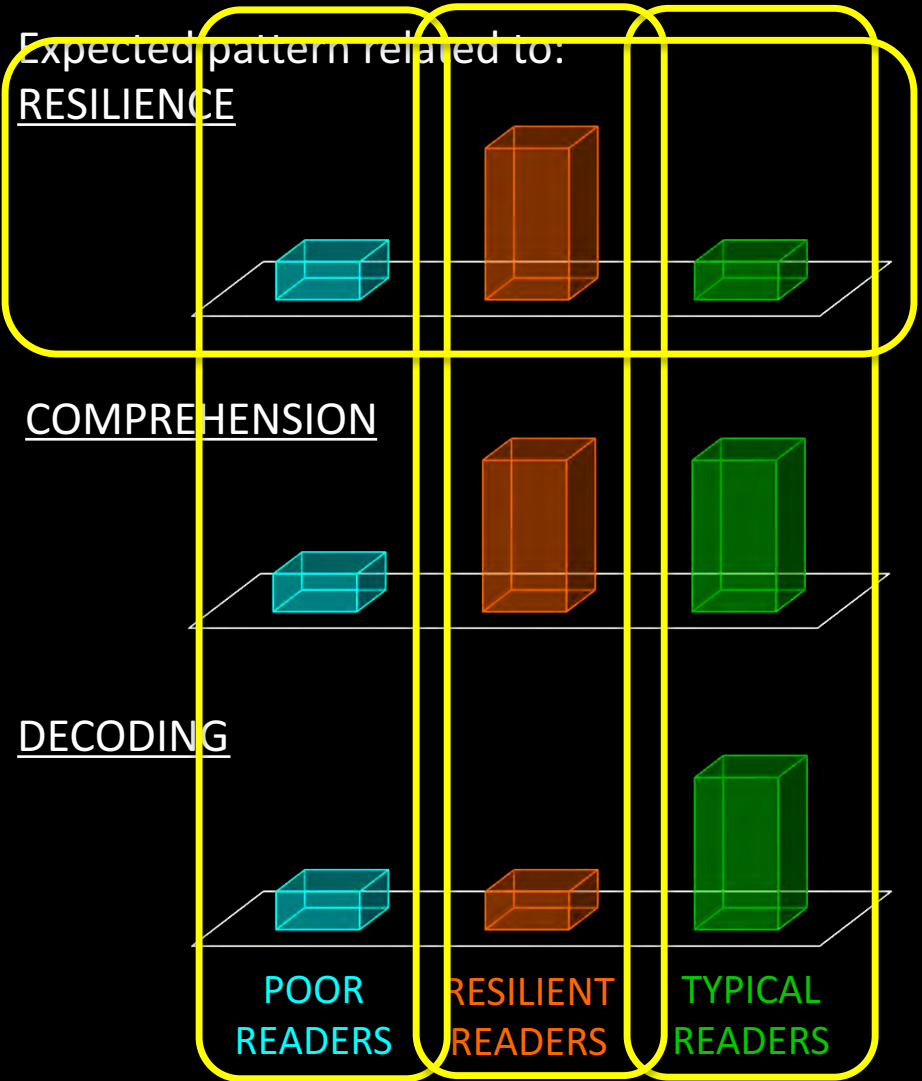

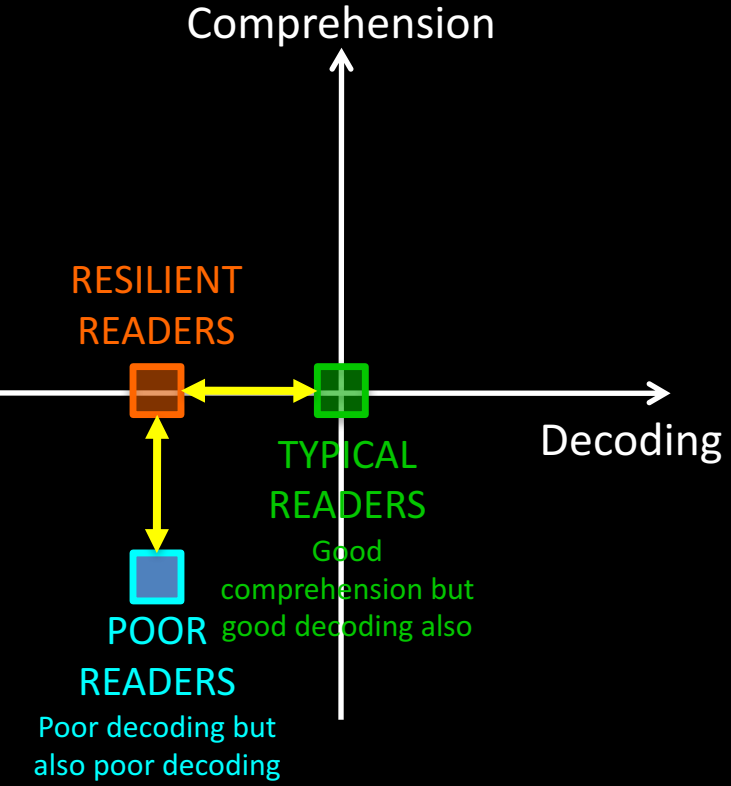

**INTERACTIVE COMPENSATORY MODEL OF DYSLEXIA**  
*(Stanovich, 1980)*

Implications for intervention.

# COGNITIVE RESILIENCE

## Brain Mechanism?

# COGNITIVE RESILIENCE

## Left Dorsolateral Prefrontal Cortex (DLPFC)

Resilient > Poor readers  
Resilient > Typical readers

RESILIENCE

COMPREHENSION

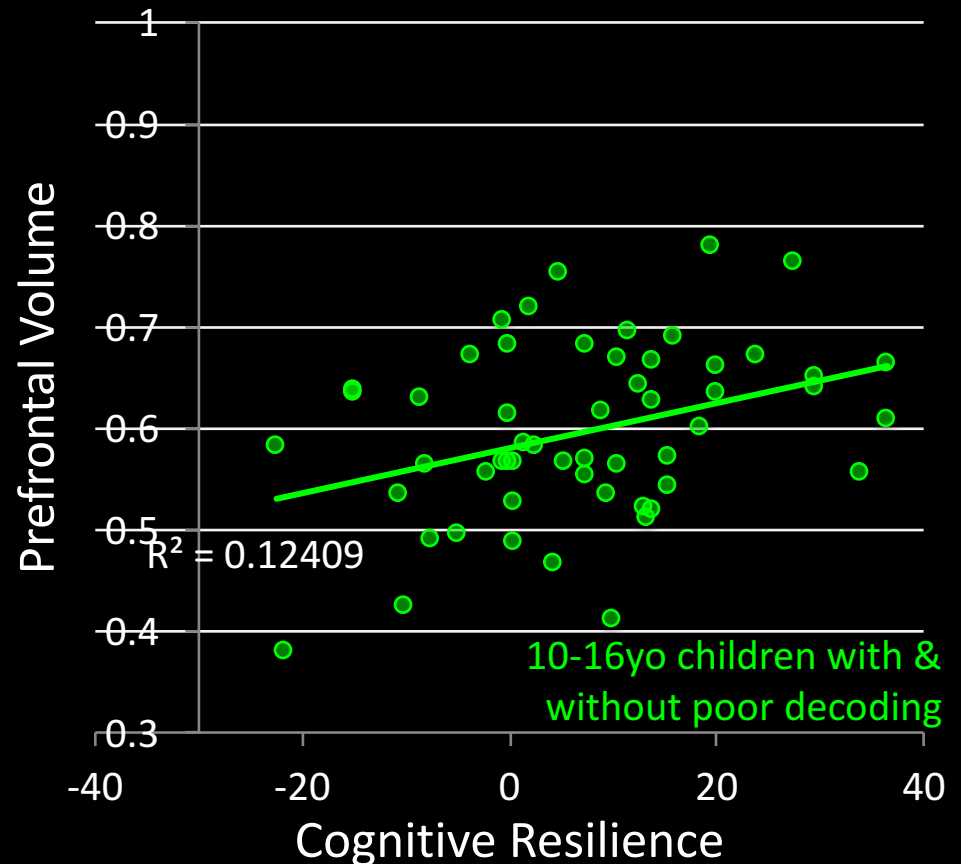

DECODING

POOR READERS    RESILIENT READERS    TYPICAL READERS

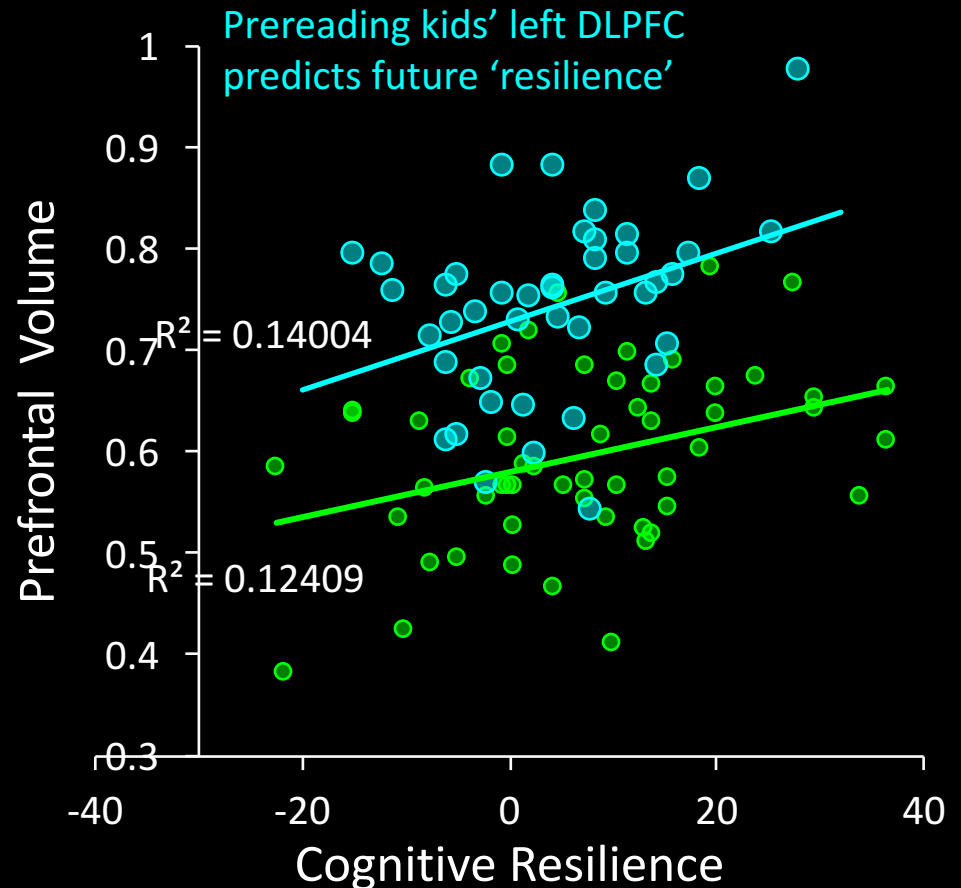

# COGNITIVE RESILIENCE

Not just dyslexics but anyone can have it.

# COGNITIVE RESILIENCE

Chicken or egg? Show signs BEFORE reading failure.

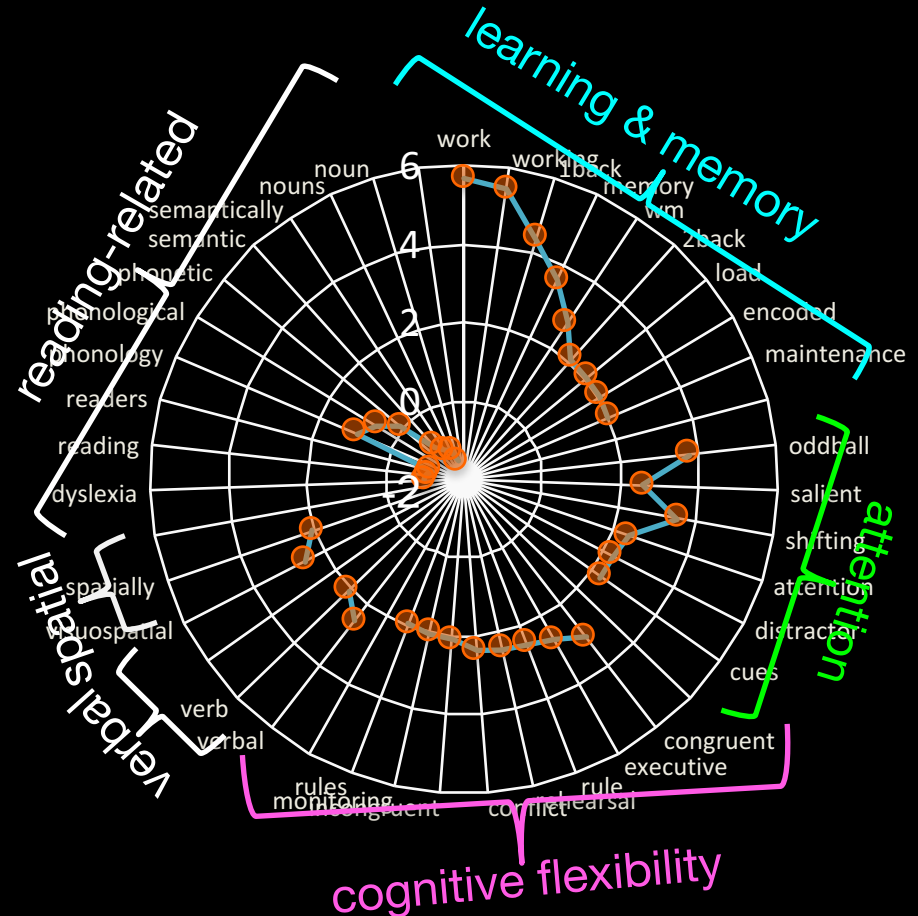

# COGNITIVE RESILIENCE

## Role of DLPFC Network?

Related to learning, attention, & cognitive flexibility

Fronto-parietal network

1000 Functional Connectome. Neurosynth.org

# COGNITIVE RESILIENCE

Fronto-parietal network “flexible learning hub”.

Dynamically changes how it connects to other key networks based on current goals.

Critical for learning new skills and building mental rules.

Allows immediate & flexible transfer of skills.

*Cole et al. Nat Neuroscience '13*

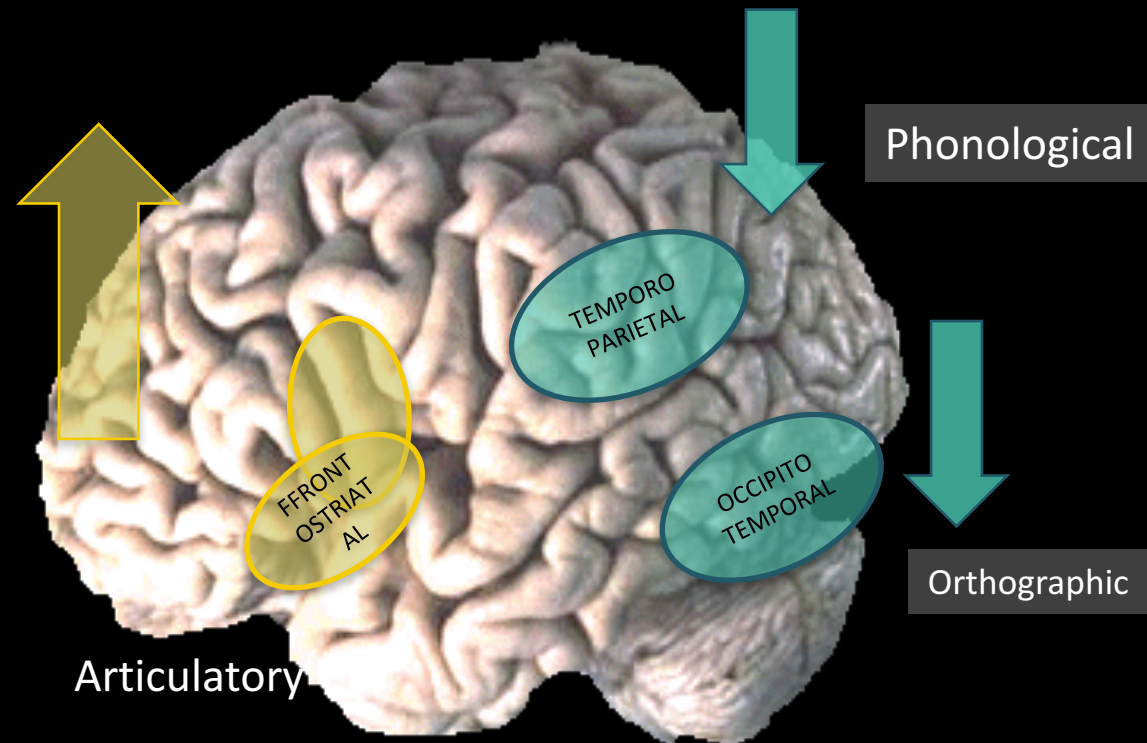

Roeland  
Hancock PhD

# COGNITIVE RESILIENCE? Other Frontal Mechanisms

*Hoefl et al. PNAS '07; Hancock Richlan Hoefl. Neurosci Beh Rev*  
*Hoefl et al. PNAS '11*

Left Fronto-Striatal Network – Articulation

Right Inferior Frontal & Fronto-Parietal White Matter – Predict outcome

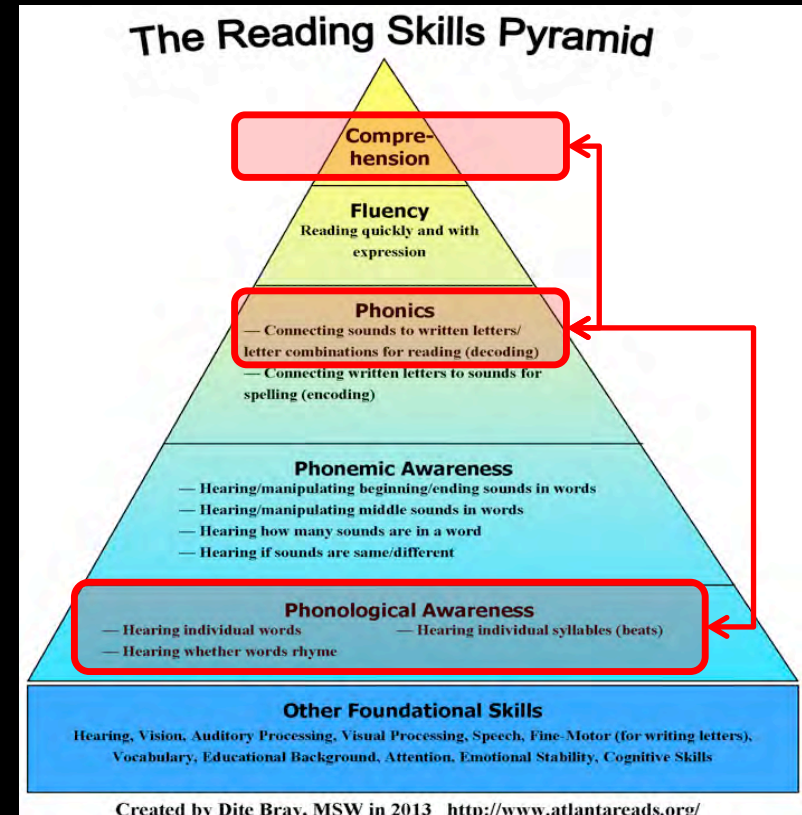

# COGNITIVE RESILIENCE: Summary

Prefrontal & fronto-parietal network

Cognitive flexibility, learning network

Importance of promoting activities to enhance cognitive flexibility & self-regulation early

- IMPORTANCE OF AN INTEGRATIVE APPROACH
  - Reading & dyslexia are complex.
  - Multiple factors impact dyslexia & success.
- THE NEW NEUROSCIENCE OF DYSLEXIA
- COGNITIVE RESILIENCE

- Small class-size

# SOCIO-EMOTIONAL RESILIENCE

## Character traits critical for success

Self discipline, more predictive than IQ (2x) & above and beyond achievement itself

(Duckworth & Seligman, Psychol Sci '05)

Academic-performance variable	Study 2 (N = 164)	
	2x Self-discipline	IQ
First-marking-period GPA	.66***	.34***
Final GPA	.67***	.32***
Spring achievement test	.43***	.36***
Selection to high school	.56***	.26**
School absences	-.26**	-.07
Homework hours	.35***	-.09
Television hours	-.33***	-.06
Time of day homework is begun	-.26**	.18*

Note. GPA = grade point average.  
\* $p < .05$ . \*\* $p < .01$ . \*\*\* $p < .001$ .

Variable	B	SE B	$\beta$
Study 1			
First-marking-period GPA	0.96	0.04	.87***
Self-discipline	0.95	0.39	.10*
Study 2			
IQ	0.01	0.01	.01
First-marking-period GPA	0.84	0.04	.89***
Self-discipline	0.76	0.33	.08*

\* $p < .05$ . \*\*\* $p < .001$ .

Above & beyond IQ & achievement

Chelsea Myers

# SOCIO-EMOTIONAL RESILIENCE

## Brain mechanisms

Myers et al. SCAN 2016

### Multiple targets – Multiple routes to enhance learning

GROWTH MIND-SET:

Belief that ability is effort based

GRIT:

Perseverance toward a long term goal

# GROWTH MINDSET

## COGNITIVE REAPPRAISAL

(Doherty et al. Science '04)

## INTRINSIC MOTIVATION

(Muyrayama et al. PNAS '10)

# GRIT

## PERSISTENCE

(Gusnard et al. PNAS '03)

## FUTURE REWARD

(Doherty et al. Science '04)

# SOCIO-EMOTIONAL RESILIENCE

## Stereotype threat may put individuals at risk

“Stereotype threat is being at risk of confirming, as self-characteristic, a negative stereotype about one’s group.” –Steele and Aronson (1995)

“White men can’t jump.”

“Women are not good at math.”

[reducingstereotypethreat.org](http://reducingstereotypethreat.org), *Whistling vivaldi* by Claude Steele

# SOCIO-EMOTIONAL RESILIENCE

## Stereotype threat MAY exist in LDs

Why might individuals with learning disabilities (including dyslexics, but also ADHD etc) experience stereotype threat?

- Group identification - low achievement
- Aware of stereotype (*Kelly and Norwich, 2004; Rashkind et al., 2006*)
- Negative academic self-concept (*Zelege, 2004*)
- Low self-esteem, negative affect, anxiety, and depression when faced with performance-avoidance goals (the desire to perform less poorly than others) (*Sideridis, 2007; Aquino, 2011*)

# SOCIO-EMOTIONAL RESILIENCE

## An Integrated Process Model of Stereotype Threat

Discordance leads to stereotype threat

"I am a girl..."

Concept of Group

Concept of Ability Domain

"Girls are bad at math (and math is important to me)..."

Reduced attention

Stress & Anxiety

Fear & Threat

Reduced learning & memory, & performance

Concept of Self

Everyone is prone.

"I think I am good at math..."

*Forbes et al., 2008*

# SOCIO-EMOTIONAL RESILIENCE

## Brain mechanism of stereotype threat?

Women & under-performance in math

*Krendl et al. Psychol Sci 2008*

Lack of improvement in math performance over time under ST (interaction:  $p < .005$ )

Lack of MATH related activation under ST

Increase in EMOTIONal response under ST

Stereotype threat impacts key cognitive networks and emotion-related networks negatively

# SOCIO-EMOTIONAL RESILIENCE

## Building Resilience Against Stereotype Threat

---

- Reframing the task (e.g. Quinn & Spencer, 2001)
- De-emphasizing threatened social identities (e.g. Stricker and Ward, 2004)
- Role models (e.g. Blanton et al., 2000)
- External attributions for difficulty (e.g. Good et al, 2003)
- Self-affirmations (e.g. Schimel et al., 2004)
- Growth mindset (e.g. Aronson et al., 2002)

Ken Pugh

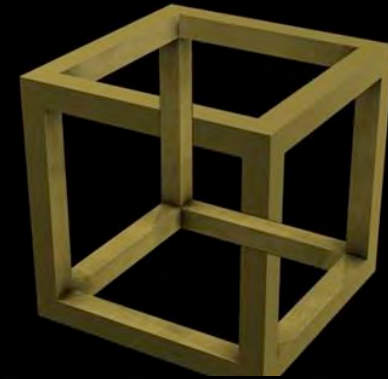

# SOCIO-EMOTIONAL RESILIENCE

## Strength-based approach may build resilience

Diehl ... Hoefft ... Pugh. *NeuroImage* '14

### Visuo-spatial processing show yin-yang relationship with reading

Poorer the reading, better the visuo-spatial (configural) abilities  
(von Károlyi et al., '01; '03).

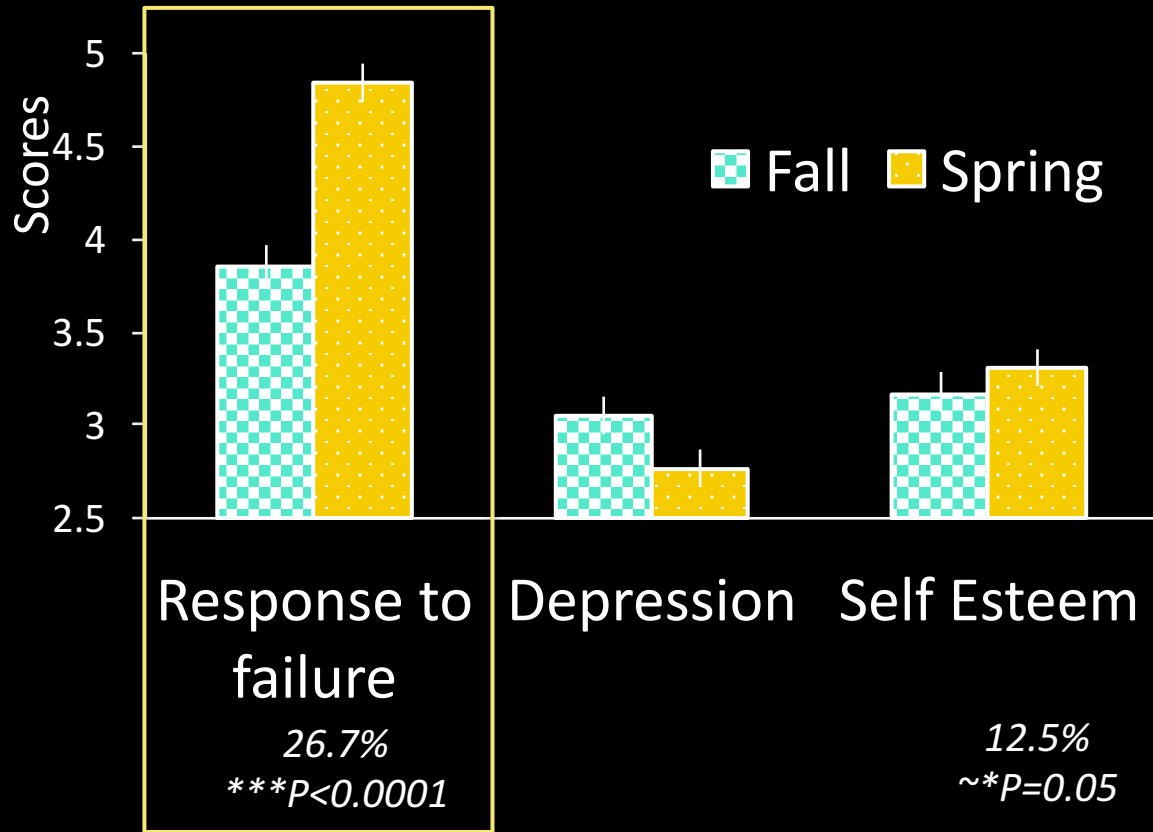

# SOCIO-EMOTIONAL RESILIENCE

## Mentoring may build resilience

**IMPROVEMENT IN:**

- SELF ESTEEM (12%)
- GRIT (value) (8-36%)
- GROWTH MINDSET (14%)
- LD IDENTITY (comfort, bond, importance) (24-52%)
- READING SELF-CONCEPT (19%)
- etc...

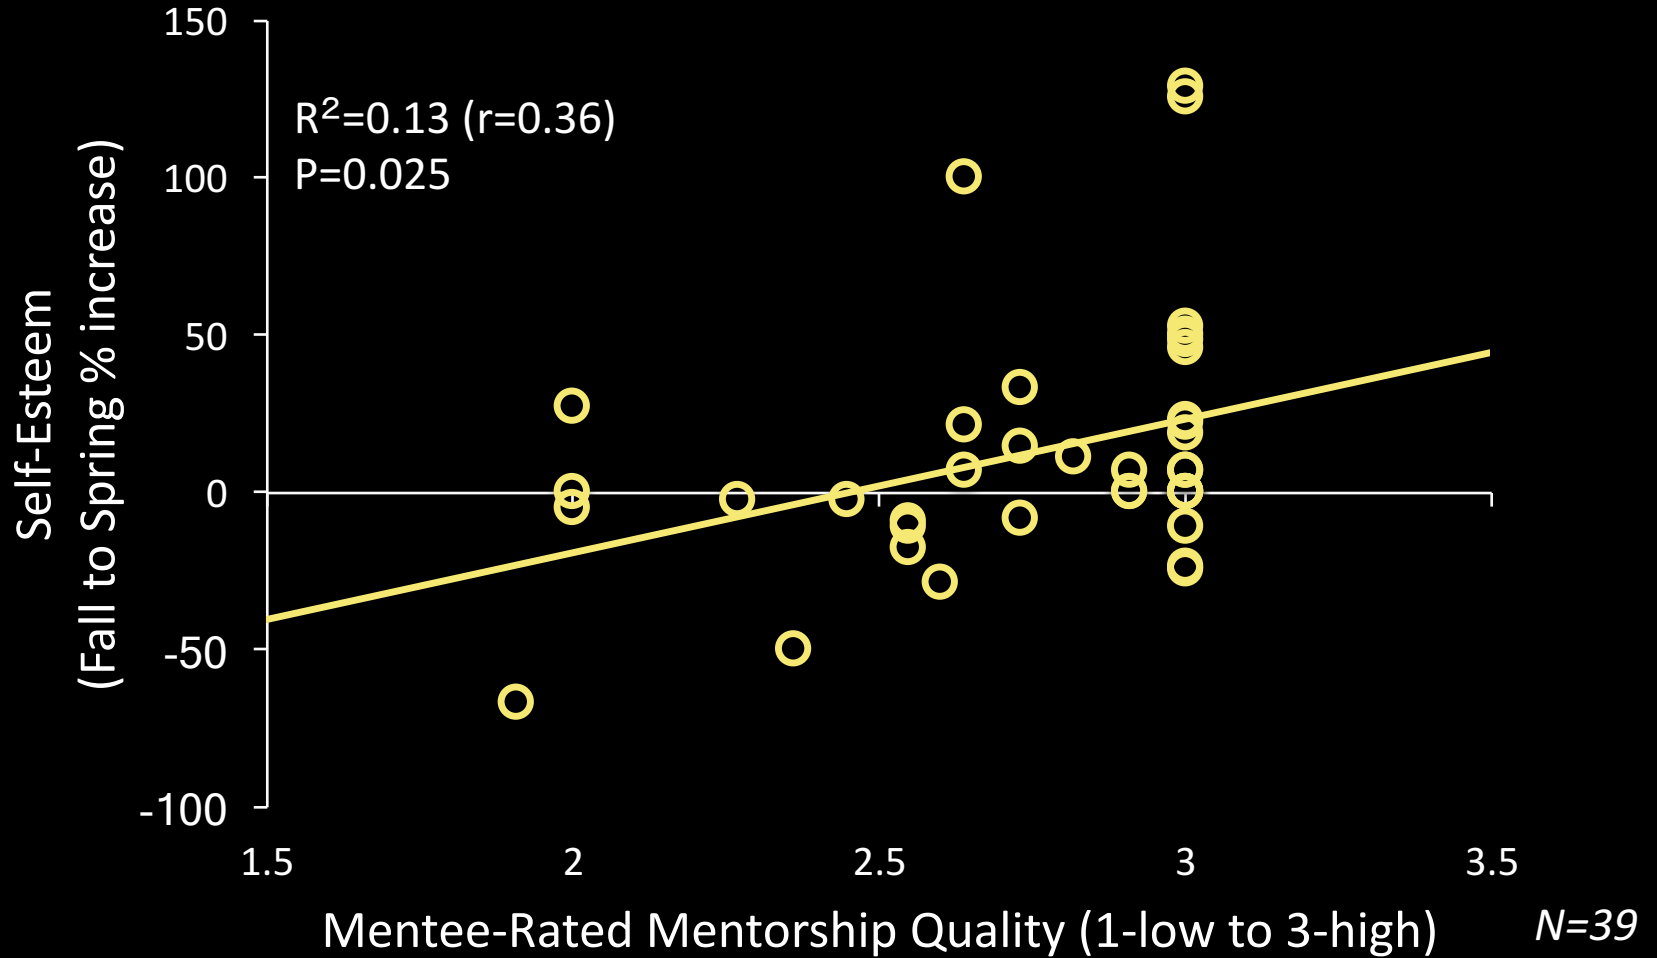

Display more positive emotions and effort-based strategies in the face of failure.

N=48

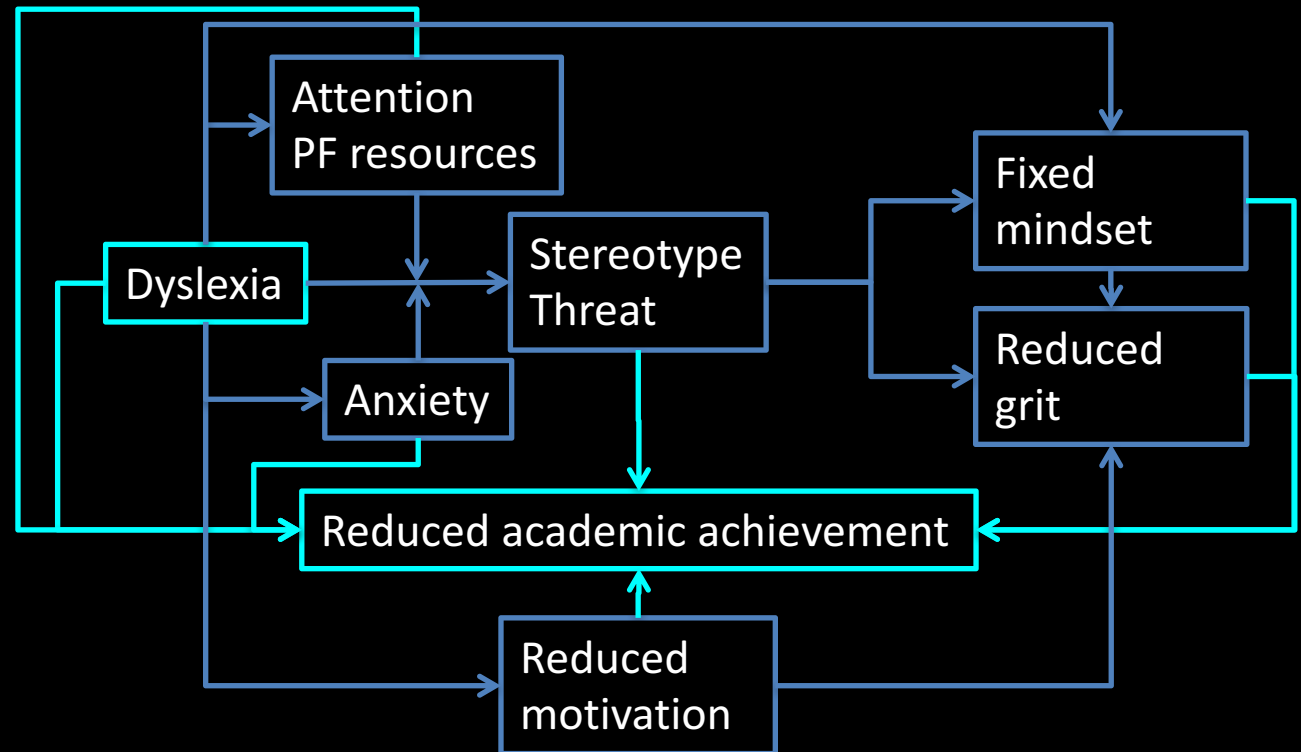

# SOCIO-EMOTIONAL RESILIENCE

## Mentoring may build resilience

# SOCIO-EMOTIONAL RESILIENCE: Summary

- Stereotype threat & fixed mindset could be potential mechanisms underlying underperformance in those with learning challenges.
- Others such as anxiety, motivation and reduced grit likely interact with stereotype threat and fixed mindset, and result in further underperformance.

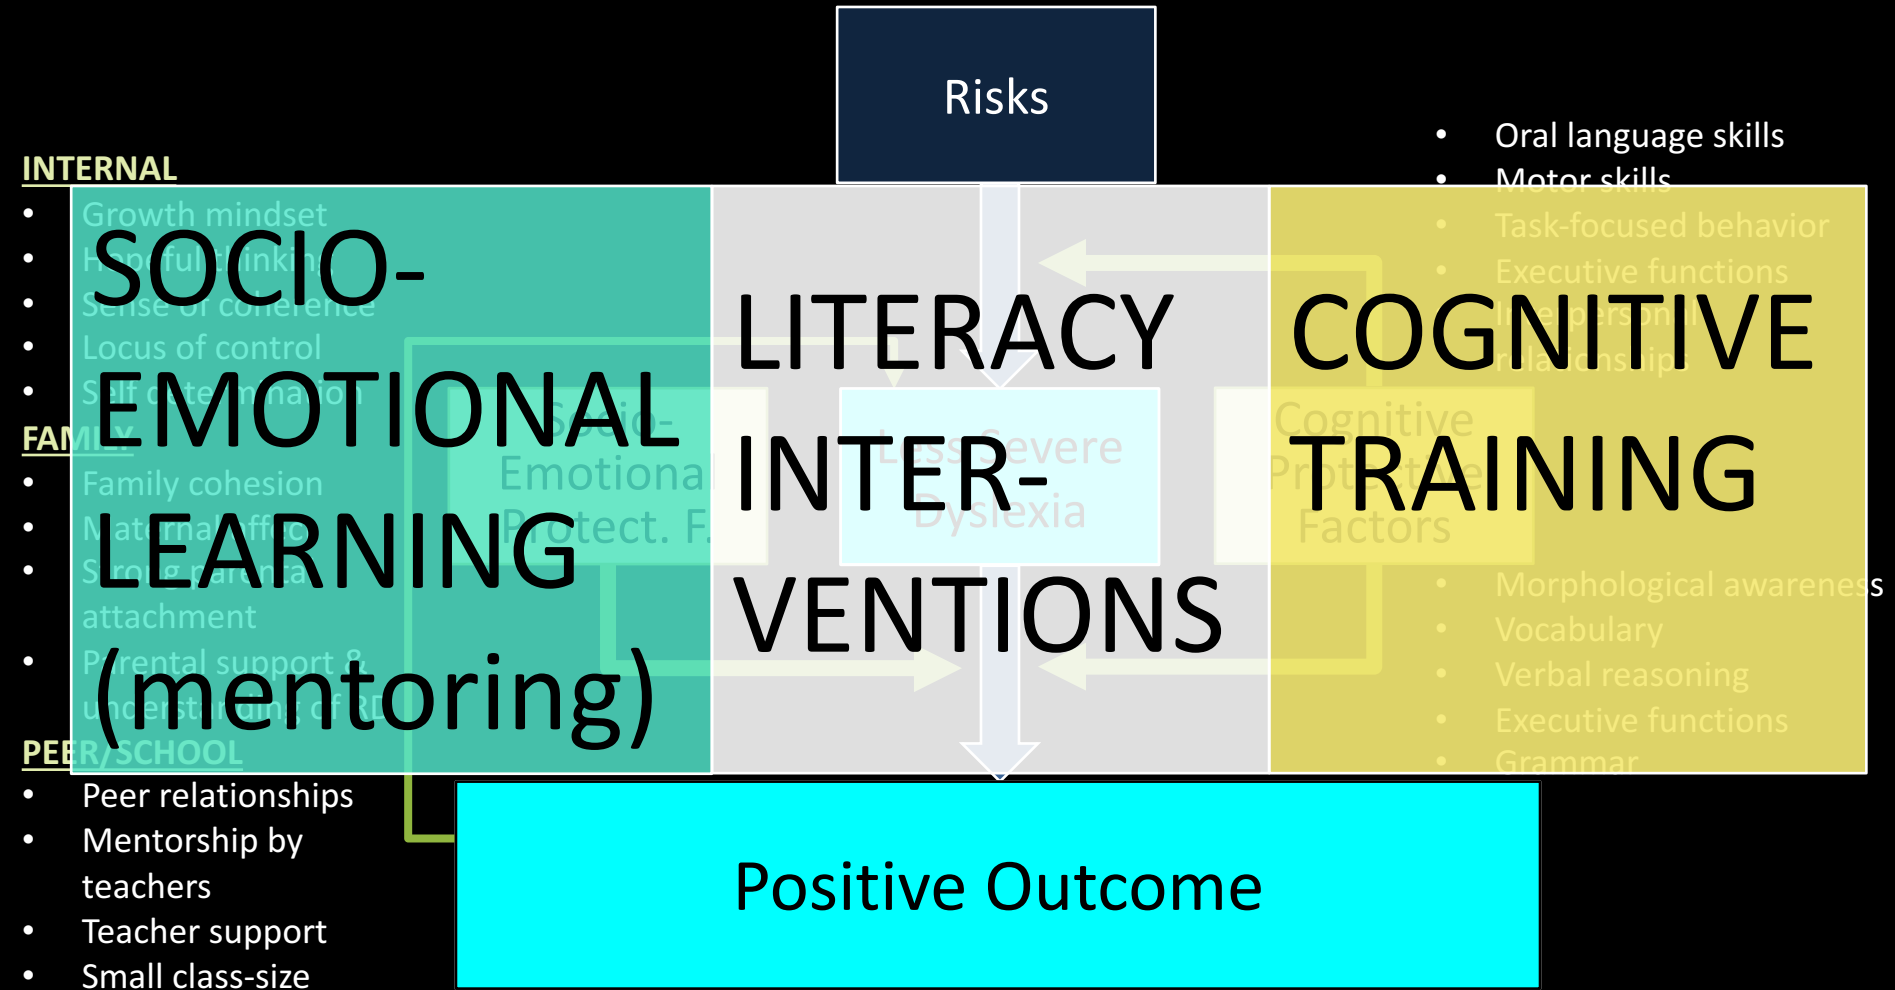

- IMPORTANCE OF AN INTEGRATIVE APPROACH
  - Reading & dyslexia are complex.
  - Multiple factors impact dyslexia & success.
- THE NEW NEUROSCIENCE OF DYSLEXIA
- COGNITIVE RESILIENCE
- SOCIO-EMOTIONAL RESILIENCE

## CONCLUSION

# CONCLUSION: Promoting Resilience

Haft, Myers, Hoefft. *Curr Opin Beh Sci* 2016

# CONCLUSION: Promoting Resilience

---

- Cognitive control, self-regulation – Cognitive reappraisal & positive reframing, Promotes grit
- Strength based approach – Confidence, Optimism
- Growth mindset – Active coping (sense of control), Optimism
- Social support, role model, mentoring – Connection to community
- Reduce stereotype threat – Optimize learning environment & enhanced performance
- Stress inoculation (exposure to tolerable levels of stress & challenges)
